

EnhancedRx Drug List

Your Guide to How to Use the Drug List

The Enhanced Drug List is a list of medicines covered by your health plan. A drug list is sometimes also called a formulary.

How does the EnhancedRx Drug List work?

The drug list is reviewed by a team of clinical experts every three months for new medicines, safety alerts and other developments. Only generic or preferred brand-name drugs covered by your pharmacy benefits are listed in this printed version. You also have coverage for non-formulary generic and brand-name drugs. Non-formulary drugs can be found by searching the online drug list at coOpportunityhealth.com/DrugList.

Who decides what’s on the drug list?

Our Pharmacy and Therapeutics Committee (P&T) manages the list. This team of clinical experts is focused on safety, effectiveness and affordability. Visit coOpportunityhealth.com for more information on how we decide what medicines are included on the drug list.

How do you use the drug list?

The medicines on the drug list are listed in alphabetical order by medicine category starting on page 3. Some medicines are listed in ALL CAPS and others are lower italics to help you determine which medicines are brand and which are generic. Generic medicines are just as safe and effective as brand medicines, but cost you less. Use this key to help:

- **Brand medicines** are in ALL CAPS (e.g., KEFLEX)
- **Generic medicines** are in lower italics (e.g., *cephalexin*)

Why do you need prior authorization for some medicines?

Even though some medicines are on the drug list, they need to meet the prior authorization criteria in order for the medicine to be covered by your pharmacy benefits. You or your doctor will need to get approval if you want your medicine to be covered by your pharmacy benefits. The approval decision is usually made the same day your doctor asks for it.

What do the abbreviations in the “More details” column mean?

This column gives special information about the medicine you’re searching for. The abbreviations let you know there might be a special program or rules for the medicine. Use this key to help you navigate the drug list:

- Prior Authorization Required 
- Step Therapy Required 
- Age Edit 
- Gender Edit Female 
- Gender Edit Male 
- Quantity Limit 
- Smoking Cessation 
- Specialty Drugs 
- Trial Drug Program 

What's Step Therapy?

Some medicines are on the drug list, but require you to try one or more other drug list medicines first. A medicine with step therapy is covered, if you've already tried the other medicine(s). If you haven't tried the other medicine(s) first, you or your doctor will need to get approval before the medicine will be covered by your lowest brand, generic or specialty copay or coinsurance. The approval decision is usually made within 2 to 3 working days of the request.

What's Age Edit?

An age edit means some medicines are only covered if you're within a specific age range. If you're not in the approved age range, you or your doctor will need to request approval if you want your medicine to be covered by your pharmacy benefits. The approval decision is usually made within 2 to 3 working days of the request.

What's Gender Edit?

A gender edit means some medicines are covered for males or females only. If you're not in the approved gender group, you or your doctor will need to request approval if you want your medicine to be covered by your pharmacy benefits. The approval decision is usually made within 2 to 3 working days of the request.

What's a Quantity Limit?

This means there is a limit on the amount of the medicine that you'll get each time you fill your prescription. The quantity limit may be less than the days supply listed in your contract or Summary Plan Description.

What's Smoking Cessation?

These are medicines that can be used to help you stop smoking. Some medicines used for smoking cessation may have limits on the amount you get.

What are Specialty Medicines?

Specialty medicines are usually prescribed by doctors whose focus is on the treatment of chronic and complex diseases. These medicines usually require a higher degree of management, have a high price and aren't always stocked at retail pharmacies. Prescriptions for these medicines must be filled at a specialty pharmacy. Log on to your secure account to check your benefits for specialty medicines.

What's Trial Drug Program?

The trial drug program applies to new prescriptions for certain medicines that may not be well tolerated due to:

- Side effects
- High cost
- High potential for waste

Your first fill of a trial drug may be limited to less than a month supply. If the drug is well tolerated and effective, you'll get the remainder of your first month supply. If a flat dollar copay applies to the medicine, you'll pay no more than one copay for each one month supply.

What's Weight Loss?

This type of medicine may have limits on the amount you get or may not be covered under all contracts. Log on to your secure account to check your benefits for weight loss. Weight Loss medicines are listed on the drug list under the Weight Loss medicine category.

How Do I Get Approval?

If approval is required, you or your doctor will need to complete the Prior Authorization/Exception Form available on coOpportunityhealth.com. You can ask for a copy of this form to be mailed to you by calling Member Services at **1.888.324.2064**.
