

CoOpportunity Health Drug List

Your Guide to How to Use the Drug List

The CoOpportunity Health Drug List is a list of drugs covered by your health plan. A drug list is sometimes also called a formulary.

How does the CoOpportunity Health Drug List work?

The drug list is reviewed by a team of clinical experts every three months for new medicines, safety alerts and other developments. Only preferred generic or preferred brand-name drugs covered by your pharmacy benefits are listed in this printed version. You also have coverage for non-preferred generic and brand-name drugs. Non-preferred drugs can be found by searching the online drug list at coOpportunityhealth.com/DrugList.

Who decides what’s on the drug list?

Our Pharmacy and Therapeutics Committee (P&T) manages the list. This team of clinical experts is focused on safety, effectiveness and affordability. Visit coOpportunityhealth.com for more information on how we decide what drugs are included on the drug list.

How do you use the drug list?

The drugs on the drug list are listed in alphabetical order by drug category starting on page 3. Some drugs are listed in ALL CAPS and others are lower italics to help you determine which drugs are brand and which are generic. Generic drugs are just as safe and effective as brand drugs, but cost you less. Use this key to help:

- **Brand drugs** are in ALL CAPS (e.g., KEFLEX)
- **Generic drugs** are in lower italics (e.g., *cephalexin*)

Why do you need prior authorization for some drugs?

Even though some drugs are on the drug list, they need to meet the prior authorization criteria in order for the drug to be covered by your pharmacy benefits. You or your doctor will need to get approval if you want your drug to be covered by your pharmacy benefits. The approval decision is usually made the same day your doctor asks for it.

What do the abbreviations in the “More details” column mean?

This column gives special information about the drug you’re searching for. The abbreviations let you know there might be a special program or rules for the drug. Use this key to help you navigate the drug list:

- Prior Authorization Required 
- Step Therapy Required 
- Age Edit 
- Gender Edit Female 
- Gender Edit Male 
- Quantity Limit 
- Smoking Cessation 
- Specialty Drugs 
- Trial Drug Program 

What's Step Therapy?

Some drugs are on the drug list, but require you to try one or more other drug list drugs first. A drug with step therapy is covered, if you've already tried the other drug(s). If you haven't tried the other drug(s) first, you or your doctor will need to get approval before the drug will be covered by your lowest brand, generic or specialty copay or coinsurance. The approval decision is usually made within 2 to 3 working days of the request.

What's Age Requirement?

An age requirement means some drugs are only covered if you're within a specific age range. If you're not in the approved age range, you or your doctor will need to request approval if you want your drug to be covered by your pharmacy benefits. The approval decision is usually made within 2 to 3 working days of the request.

What's Gender Requirement?

A gender requirement means some drugs are covered for males or females only. If you're not in the approved gender group, you or your doctor will need to request approval if you want your drug to be covered by your pharmacy benefits. The approval decision is usually made within 2 to 3 working days of the request.

What's a Quantity Limit?

This means there is a limit on the amount of the drug that you'll get each time you fill your prescription. The quantity limit may be less than the days supply listed in your individual policy or benefit certificate.

What's Smoking Cessation?

These are drugs that can be used to help you stop smoking. Some drugs used for smoking cessation may have limits on the amount you get.

What are Specialty Drugs?

Specialty drugs are usually prescribed by doctors whose focus is on the treatment of chronic and complex diseases. These drugs usually require a higher degree of management, have a high price and aren't always stocked at retail pharmacies. Prescriptions for these drugs must be filled at a specialty pharmacy. Log on to your secure account to check your benefits for specialty drugs.

What's Trial Drug Program?

The trial drug program applies to new prescriptions for certain drugs that may not be well tolerated due to:

- Side effects
- High cost
- High potential for waste

Your first fill of a trial drug may be limited to less than a month supply. If the drug is well tolerated and effective, you'll get the remainder of your first month supply. If a flat dollar copay applies to the drug, you'll pay no more than one copay for each one month supply.

What's Weight Loss?

This type of drug may have limits on the amount you get or may not be covered under all contracts. Log on to your secure account to check your benefits for weight loss. Weight Loss drugs are listed on the drug list under the Weight Loss drug category.

How Do I Get Approval?

If approval is required, you or your doctor will need to complete the Prior Authorization/Exception Form available on coOpportunityhealth.com. You can ask for a copy of this form to be mailed to you by calling Member Services at **1.888.324.2064**.

1.888.324.2064
